

REMARKS/ARGUMENTS

In response to the Office Action dated January 5, 2004, Applicants respectfully request reconsideration based on the above claim amendments and the following remarks. Applicants respectfully submit that the claims as presented are in condition for allowance.

Claims 1-16 are pending. Claims 1-16 have been rejected. Claims 1 and 10 are independent claims from which claims 2-9, and 11-16 respectively depend. Claims 1, 2 and 10 have been amended. No new matter has been added. Support for the amendments can be found in the application as originally filed on page 6, third paragraph, and elsewhere in the application.

Claim 10 has been rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regard as the invention. Claim 10 has been amended to provide proper antecedent basis. Withdrawal of the rejection of claim 10 under 35 U.S.C. § 112, second paragraph, is respectfully requested.

Claims 1, 5-11 and 15-16 have been rejected under 35 U.S.C. § 103(a) as being unpatentable over Kennedy et al., U.S. Patent Number 6,377,825 B1 in view of Meidan et al., U.S. Patent Number 5,509,048. It is respectfully submitted that these claims are patentable for the reasons set forth below.

Neither Kennedy nor Meidan alone or in combination disclose or suggest at least the italicized feature of Applicants' amend claim 1. Applicants' amended claim 1 recites:

Apparatus for displaying information from a portable communications device having a data output port on a remote projection display device having a data input port, the apparatus comprising:

a first data port that is adapted to be coupled to the data output port of the portable communications device, the first data port for receiving data from the portable communications device; and

a second data port that is adapted to be coupled to the data input port of the remote projection display device, the second data port for providing to the remote projection display device a representation of the *remote* data received at the portable communications device, wherein the representation of the received *remote* data is in a format from which the remote projection display device can provide a projected display of information based on the received *remote* data.

Kennedy discloses a pocket for holding a wireless communication and an interface module in communication with the pocket. Kennedy does not disclose or suggest an

interface with a projection display device. Meidan discloses a radiotelephone coupled to a heads up display to display telephone control signals such as "ringing" or "dialing" or a dialed telephone number but does not disclose or suggest the display of remote data as recited by Applicants' amended claim 1. Amended claim 10 includes analogous language. Therefore, Applicants respectfully request the withdrawal of the 103 rejections of claims 1 and 10 and the claims that depend directly and indirectly therefrom.

Claims 2, 3, 13 and 14 have been rejected under 35 U.S.C. § 103(a) as being unpatentable over Kennedy in view of Meidan and further in view of Klausner, U.S. Patent No. 6,489,934 B1.

Klausner discloses a cellular telephone having the ability to reformat a data display but does not cure the deficiencies of Kennedy and Meidan. Therefore, Applicants respectfully request the withdrawal of the §103(a) rejections of claims 2, 3, 13 and 14 for the reasons discussed above.

Claim 4 has been rejected under 35 U.S.C. § 103(a) as being unpatentable over Kennedy in view of Meidan and Klausner, and further in view of Tsai, U.S. Patent No. 6,339,700 B1.

Tsai discloses a cellular telephone with a hands free receiver mounted on a steering wheel of an automobile but does not cure the deficiencies of Kennedy and Meidan. Therefore, Applicants respectfully request the withdrawal of the rejection of claim 4 for the reasons discussed above.

A replacement FIGURE 1 is enclosed. Applicants request that the former hand-drawn FIGURE 1 be replaced by the enclosed formal drawing for FIGURE 1. No changes have been made to FIGURE 1. No new matter has been added to FIGURE 1.
